MEGA STEEL-panel formwork with stainless steel sheeting

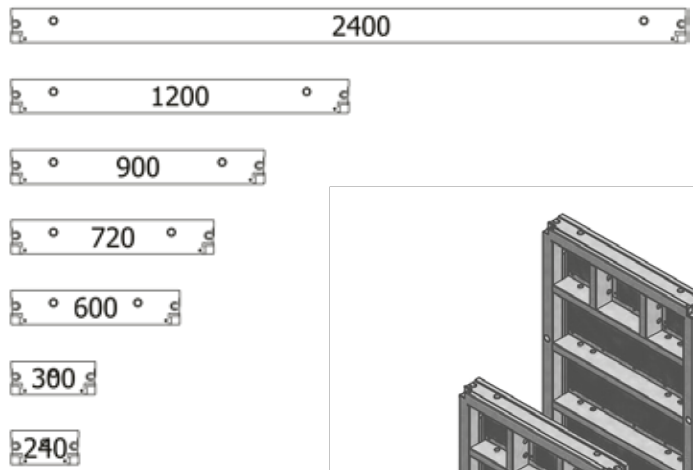

The Mega steel system is a modular panel formwork, specially designed for on-site concrete jobs where a fair-faced finish is required or where extremely high concrete pressure occur.

The panels are made of a high-quality painted steel frame and a top quality 5mm stainless steel sheeting. The sheet lies on top of the profiles so the joints between the panels are reduced to a very thin line.

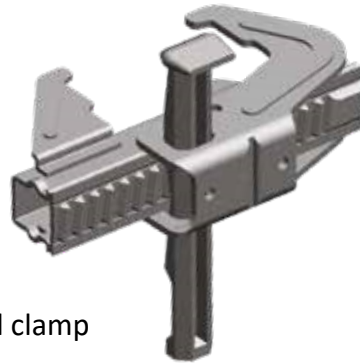

Product specifications:

- Modular panel formwork
- Panel thickness 120mm
- Extremely strong and rigid
- Fully compatible with Tricon system
- Large size panels
- Limited number of parts
- High pressure resistance, minimum 100kn/m²
- Long life expectancy
- Stainless although magnetic sheets

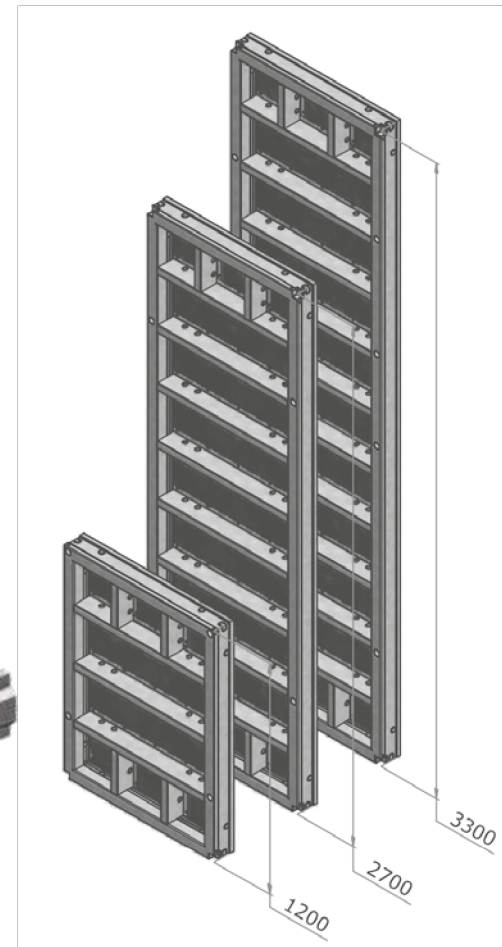

Panel types:

- Identical and compatible with TRICON
- 3 heights: 3300mm, 2700mm, 1200mm
- 7 widths: 2400mm, 1200mm, 900mm, 720mm, 600mm, 300mm and 240mm

Panel clamp

Utilisation of MEGA STEEL panel system

Assembly, fitting, and applications are similar to the TRICON system. Tricon on one side and Mega on the other side or side by side is possible.
